## Quality

**Students receive a hands on learning experience with at least 50% lab time.** Complete control of our courseware allows us to update it more frequently based on student and instructor feedback. Remote attendees utilize the same equipment and obtain the same real-time attention and feedback from the instructor and other students.

Small class sizes (an average of 6-8 students) mean more direct instructor facilitation.

HOTT instructors are dedicated technology experts with an average of over 10 years experience in IT programming and training. Our requirements for instructor performance are so stringent that only a tiny fraction of professional instructors currently teaching for competitors can even be considered for an interview. Less than half of those pass our screening and are ever offered a position with HOTT.

**"HOTT definitely gets you involved into course knowledge by giving 'hands on' training. A great element of the course structure!"**

**- J.C., Department of Homeland Security**

**"The teachers know their stuff - the content was clear and concise. There were many 'real' examples to further explain their point!"**

**- R.V., Industrial Alliance Pacific Life Insurance**

## Training Delivery Options

HOTT offers live, instructor-led IT training courses. Regardless of how you attend training, our courses are designed to spend at least 50% of class-time working with comprehensive hands on exercises.

### ▶▶ Face-to-Face Training

Attend training face-to-face in a classroom-based setting. Our small class sizes assure personal attention. We offer more than 100 locations across the [United States](#), [Canada](#) and the [United Kingdom](#), minimizing the need for travel. For clients who must travel to a course location, HOTT offers cost effective travel packages. Pay no additional fees for application, registration, or cancellation.

### ▶▶ Remote Attendance

HOTT offers a remote attendance option for students who are not located near a training location. Remote access students attend the same live training delivery as students in the classroom. Two-way video and audio communication allows participation as close to “being there” as possible, including the ability to remotely control the broadcast camera, dynamically interact with questions or comments and collaborate during labs.

### ▶▶ On Site

If you're scheduling training for more than 5 or 6 people at your facility, you should consider on site training. This focused, cost-effective training option can save you 25-30% or more compared to individual tuition prices. Training at your facility allows us to zero in on your specific requirements and, since we own our courseware, there is no extra charge for curriculum adjustments. On site training is available worldwide.
